

JASWAANTH NARAYANASAMY

ASPIRING SOC ANALYST • CYBERSECURITY UNDERGRADUATE

Hendala, Sri Lanka • +94 74 308 0258 • jaswaan7835@gmail.com
linkedin.com/in/jaswaan-narayanamy7835 • github.com/jaswaan7835-gif

PROFILE

Cybersecurity undergraduate with hands-on experience in digital forensics, a personal attack-and-defence lab and secure web development. Built and deployed a live web application with role-based access control and audit logging as main developer in an Agile team. Currently completing the TryHackMe SOC Level 1 path and seeking a SOC analyst internship where I can apply log analysis, alert triage and incident reporting skills.

EDUCATION

BSc (Hons) Cyber Security – University of Staffordshire (APIIT Sri Lanka)

Expected 2028

Relevant modules: Cybersecurity; Digital Forensics Fundamentals; Data Analytics; Professional Practice and Project Management; Hardware, Microcontrollers and Sensors

Edexcel IGCSE

Grades: 1 A, 2 B, 2 C, 1 D

TECHNICAL SKILLS

- **Security:** Incident analysis, digital forensics, alert triage (learning), penetration testing basics (Metasploit), role-based access control, audit logging
- **Systems:** Kali Linux, Linux, Windows, VMware virtualisation, networking fundamentals (TCP/IP, DNS, HTTP)
- **Programming & Data:** Python, Django, SQL (MySQL), HTML/CSS, JavaScript, Power BI
- **Tools & Methods:** Git/GitHub, Railway cloud hosting, Trello, Scrum/Agile

PROJECTS AND ACHIEVEMENTS

Altium – HR Performance Management System

Group project, 2026

- Main developer in a 4-person Agile (Scrum) team, delivering the system across two sprints.
- Built and deployed a live Django/MySQL web app with role-based access for five user roles, audit logging, anonymous 360° peer reviews and secrets stored securely in environment variables.

Digital Forensic Investigation – Disk Image CBARROW-29th.E01

2026

- Examined a suspect's disk image, recovered and documented digital evidence, and wrote a structured forensic report.

Ransomware Incident Case Study – MediSecure

2026

- Analysed a ransomware attack and the organisation's response; presented findings to a panel and defended them in a viva.

Personal Security Lab

Ongoing

- Set up Kali Linux, Metasploitable 2 and DC-1 on VMware to practise attack techniques and understand how to detect and defend against them.

Heart Disease Data Analytics Dashboard

2026

- Cleaned and analysed the UCI Heart Disease dataset and presented key patterns in an interactive Power BI dashboard.

Secure Industrial Loading Gate – ESP32 IoT System

2026

- Designed an ESP32-based IoT system with sensors to control and secure access to an industrial loading gate.

CERTIFICATIONS AND TRAINING

- TryHackMe SOC Level 1 learning path – in progress (target: December 2026)
- CompTIA Security+ – planned (target: June 2027)

LANGUAGES AND SOFT SKILLS

- **Languages:** English, Sinhala, Tamil
- **Soft skills:** Teamwork, presenting to panels, written reporting, rotating Scrum roles (Developer, Scrum Master, Business Analyst, QA)
